

THE POOCH'S PANTRY

this Fall

SmartBones

All dogs have an inherent desire to chew, especially puppies. Destructive chewing is often the result of a normal desire to chew and relieve boredom. Pet chews are the perfect answer to this problem, and SmartBones offer nutrition and health benefits as well. SmartBones are fortified with vitamins and minerals to ensure dogs' daily diets are nutritionally balanced when combined with eating dry kibble dog food.

Hey, Paw-tender!

For years the battle of canine versus booties has been waged in living rooms, on street corners and in backyards. Enter **Power Paws**, a sock-based solution whose fresh face is revitalizing the marketplace and strengthening the relationship between paws and floors. Most shoes for canines tend to be bulky, poorly fitted, and use buckles, belts or velcro to stay in place. Needless to say they end up on the floor rather than on their feet. With Power Paws, dogs quickly forget they have anything on, and are able to run and stop with confidence. Best of all Power Paws won't scuff floors, and they keep nails from denting and scratching pricey hardwoods. Eight sizes available. www.woodrowwear.com

The Perfect Dog Toy

Made of 100% polyurethane, The Perfect Dog Toy will not hurt dogs if they happen to chew through it, which is virtually impossible. Because The Perfect Dog Toy does not contain any rubber or latex, the chewed pieces will just pass through. Perhaps the greatest part of The Perfect Dog Toy is the easy-to-clean design. One trip through the dishwasher or a quick rinse with soap and water will result in a toy that is as good as new. Fido can chew for hours without harming his health or making a disastrous mess. Ten color choices available. www.justduckyprompts.com
